· Hazard pictograms
GHS05

· Signal word Danger

· Hazard-determining components of labelling: tetrasodium ethylenediaminetetraacetate sodium hydroxide

· Hazard statements

H314 Causes severe skin burns and eye damage.

**Precautionary statements** 

P260 Do not breathe mist/vapours/spray.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water [or shower].

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P310

Immediately call a POISON CENTER/doctor. P501 Dispose of contents/container in accordance with local/regional/national/international regulations.

• Additional information:

EUH208 Contains Cineole, Terpineol. May produce an allergic reaction.

- 2.3 Other hazards The product does not contain any organic halogen compounds (AOX), nitrates, heavy metal compounds.
- · Results of PBT and vPvB assessment

· PBT: Not applicable.

· vPvB: Not applicable.

#### **SECTION 3: Composition/information on ingredients**

· 3.2 Mixtures

• Description: Mixture of substances listed below with nonhazardous additions.

• Dangerous components:		
CAS: 64-02-8 EINECS: 200-573-9 Index number: 607-428-00-2 Reg.nr.: 01-2119486762-27-xxxx	tetrasodium ethylenediaminetetraacetate STOT RE 2, H373 Eye Dam. 1, H318 Acute Tox. 4, H302; Acute Tox. 4, H332	≥5-<10%

EDTA and salts thereof	≥5 - <15%
Amphoteric surfactants, Phosphonates, Nonionic surfactants	<5%
Perfumes (LIMONENE), Preservation agents (METHYLISOTHIAZOLINONE, BENZISOTHIAZOLINONE, METHYLCHLOROISOTHIAZOLINONE AND METHYLISOTHIAZOLINONE)	
· Additional Information: For the wording of the listed hazard phrases refer to section 16.	

**SECTION 4: First aid measures** 

### • 4.1 Description of first aid measures

- · General information: Immediately remove any clothing soiled by the product.
- After inhalation:

Supply fresh air. If required, provide artificial respiration. Keep patient warm. Consult doctor if symptoms persist. In case of unconsciousness place patient stably in side position for transportation.

• After skin contact:

Immediately wash with water and soap and rinse thoroughly.

- Seek medical treatment.
- After eye contact: Rinse opened eye for several minutes under running water. Then consult a doctor.
- After swallowing:
- Do not induce vomiting; call for medical help immediately.
- Drink plenty of water and provide fresh air. Call for a doctor immediately.
- · 4.2 Most important symptoms and effects, both acute and delayed No further relevant information available.
- 4.3 Indication of any immediate medical attention and special treatment needed No further relevant information available.

## **SECTION 5: Firefighting measures**

- 5.1 Extinguishing media
- Suitable extinguishing agents:

Use fire extinguishing methods suitable to surrounding conditions. Carbon dioxide

Dry sand

- 5.2 Special hazards arising from the substance or mixture No further relevant information available.
- · 5.3 Advice for firefighters
- Protective equipment:
- Do not inhale explosion gases or combustion gases.
- Wear fully protective suit.
- Wear self-contained respiratory protective device.

## **SECTION 6: Accidental release measures**

- 6.1 Personal precautions, protective equipment and emergency procedures
- Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation
- Use respiratory protective device against the effects of fumes/dust/aerosol.
- 6.2 Environmental precautions: Do not allow to enter sewers/ surface or ground water.
- · 6.3 Methods and material for containment and cleaning up:

Absorb with liquid-binding material (sand, diatomite, universal binders).

Use neutralising agent.

Dispose contaminated material as waste according to item 13.

- Ensure adequate ventilation. 6.4 Reference to other sections
- **6.4** *Kejerence to other sections*
- See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

## **SECTION 7: Handling and storage**

#### · 7.1 Precautions for safe handling

Store in cool, dry place in tightly closed receptacles.

Use only in well ventilated areas.

· Information about fire - and explosion protection: No special measures required.

(Contd. on page 4)

Protective gloves

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation *Material of gloves* 

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. The determined penetration times according to EN 16523-1:2015 are not performed under practical conditions. Therefore a maximum wearing time, which corresponds to 50% of the penetration time, is recommended.

· Not suitable are gloves made of the following materials: Strong material gloves

· Eye/face protection

Tightly sealed goggles

• *Body protection:* Alkaline resistant protective clothing

	PBT and vPvB assessment
• <b>PBT:</b> Not applic	
• vPvB: Not applie	
	<i>disrupting properties</i> The product does not contain substances with endocrine disrupting properties.
• 12.7 Other adver	<i></i>
· Additional ecolo	gical information.

· Additional ecological information:

· General notes:

In accordance with the requirements of the RVO in the Act on Detergents and Cleansing Agents, tensides are biodegradable up to at least 90 %.

Must not reach sewage water or drainage ditch undiluted or unneutralised.

Rinse off of bigger amounts into drains or the aquatic environment may lead to increased pH-values. A high pH-value harms aquatic organisms. In the dilution of the use-level the pH-value is considerably reduced, so that after the use of the product the aqueous waste, emptied into drains, is only low water-dangerous.

#### Annex: Exposure scenario • Short title of the exposure scenario For the finished product. · Sector of Use SU22 Professional uses: Public domain (administration, education, entertainment, services, craftsmen) SU3 Industrial uses: Uses of substances as such or in preparations at industrial sites • Product category PC35 Washing and cleaning products (including solvent based products) • Description of the activities / processes covered in the Exposure Scenario See section 1 of the annex to the Safety Data Sheet. · Conditions of use · Duration and frequency 5 workdays/week. · Physical parameters · Physical state Fluid • Concentration of the substance in the mixture The substance is main component. · Used amount per time or activity According to directions for use. Other operational conditions • Other operational conditions affecting environmental exposure No special measures required. • Other operational conditions affecting worker exposure Avoid contact with eyes. Avoid contact with the skin. Avoid long-term or repeated skin contact. Other operational conditions affecting consumer exposure No special measures required. Keep out of the reach of children. • Other operational conditions affecting consumer exposure during the use of the product Not applicable. · Risk management measures Worker protection · Organisational protective measures No special measures required. · Technical protective measures Ensure that suitable extractors are available on processing machines Use product only in enclosed systems. Personal protective measures Do not inhale gases / fumes / aerosols. Avoid contact with the skin. Avoid contact with the eyes. Tightly sealed goggles protective gloves · Measures for consumer protection Ensure adequate labelling. Keep locked up and out of the reach of children. · Environmental protection measures · Water No special measures required. Generally, prior to the introduction of wastewater into wastewater treatment plants a neutralisation is required. · Disposal measures Disposal in accordance with administrative provisions Ensure that waste is collected and contained. • Disposal procedures Must not be disposed together with household garbage. Do not allow product to reach sewage system. · Waste type Partially emptied and uncleaned packaging • Exposure estimation · Consumer Not relevant for this Exposure Scenario. · Guidance for downstream users No further relevant information available.
